

Job Opening: Front-end Developer - Amsterdam

SAI is a young digital design firm located in the heart of Amsterdam. We work with some of the world's best brands. Amongst other design related projects, we are currently developing unique products that will transform the way people interact with companies.

We are looking for a talented Front-end Developer to join our growing Technology team on a wide range of tasks, with an initial focus on Artificial Intelligence projects.

Responsibilities

- Translate functional requirements to development tasks and execute to high standard.
- Programming and development of front-end interfaces with the potential to scale, grow in complexity or even become products.
- Identify technologies that raise the quality, aesthetics, interactivity and utility of our digital work.

Skills:

- Computer engineer background or similar.
- Development fundamentals e.g. HTML, JavaScript, and CSS.
- Responsive and Mobile Design.
- JavaScript frameworks e.g. AngularJS or React (+2 years of experience).
- Libraries e.g. jQuery or Backbone.js.
- Frameworks e.g. Foundation or Bootstrap.
- Cross-browser development.
- Experience with RESTful Services and APIs.
- Immaculate, maintainable, testable and efficient code.
- Nice to have: experience with agile methodologies.

Characteristics:

- Passionate about technology, design and innovative projects and data management.
- Ambitious, geeky and committed creative thinker.
- Curious, hardworking, loves to learn and to teach.
- Loves sport (preferably participating).

Benefits of working at SAI:

- Valuable, hands-on experience working with bleeding-edge design and software.
- World-class companies across different sectors.
- Being part of an AI team within an international, talented company.
- Friendly atmosphere in a cool, young and creative environment.

Contact: please submit your Github/CV/portfolio/covering letter to info@ateliersai.com.

Start date: February 2019 onwards.

Period: 3 months minimum first contract.
